

ANNOUNCEMENT

CLYMER FARNER BARLEY, INC (CFB) ANNOUNCES NEW ENVIRONMENTAL DIVISION AND WELCOMES DAVID LOY AS DIRECTOR

Fall 2023

Clymer Farner Barley, Inc (CFB) is pleased to announce the expansion of our operations with the launch of our Environment Division. The division will offer a range of services aimed at preserving and enhancing the natural environment through innovative and sustainable site planning solutions.

To lead this initiative, we are thrilled to introduce David Loy as the newly appointed Environmental Director of this division. David, a Certified Ecologist and ISA Certified Arborist, is a distinguished expert in environmental sciences with over 19 years of experience in public and private sectors.

David has served as a technical manager and a senior ecologist on numerous ecological restoration and wetland monitoring projects across Florida. David has been instrumental in some of the largest seagrass enhancement and restoration projects in the state and has worked with local stakeholders to develop long-term monitoring programs aimed at quantifying changes to critical coastal habitats.

"I am excited to join CFB and have the opportunity to work in daily collaboration with our environmental engineers, designers, and technical specialists to help empower businesses, municipalities, and organizations to make ecologically responsible decisions that benefit both the environment and their ultimate project goals."

This initiative is a testament to CFB's commitment to environmental sustainability. We are excited to see the positive impact this division and David's team will have on our company, clients, community, and the environment.
